

# WebNotarius

Verify the authenticity  
of e-signatures.

ASRECO

## WebNotarius

### Verify the authenticity of e-signatures.

WebNotarius is the first and only qualified service in Poland for validating electronic signatures and seals, compliant with the eIDAS regulation. It confirms their authenticity and gives a 100% guarantee that the document has not been altered in any way. The solution can be used by companies, organizations and public administration.

#### With WebNotarius service you will gain:

- Guarantee of security and confidentiality of documents sent for validation.
- Ability to check even extremely large volumes of documents.
- Increased business efficiency and accelerated paperless processes.
- An efficient tool that complies with your company's internal procedures.

---

#### One service. Multiple documents.

With WebNotarius, you can check all documents signed or sealed with any e-signature from across the European Union, including:

business agreements

tender documents

invoices and offers

## Why WebNotarius?

### **Security**

You get secure validation of all e-signatures from the EU.

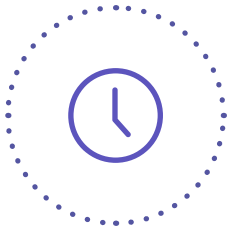

### **Regulatory Compliance**

You are using a certified service that complies with the EU eIDAS regulation.

### **Efficiency**

You ensure efficient and error-free verification of e-documents.

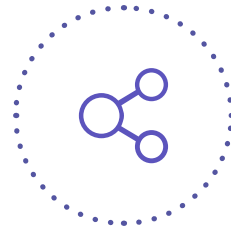

### **Time savings**

You send verified documents on-line quickly, inexpensively and conveniently.

### **24/7 Access**

You get access to the service anytime, anywhere.

### **Integration/API**

You integrate the service with any document circulation system.

---

## Tailor WebNotarius to your needs.

### **Would you like to verify e-documents on your website?**

#### **Choose WebNotarius – Web service!**

The service is placed on your website. By doing so, you can share it with employees, customers, and partners. You get the result of document verification e.g. as a pdf report.

### **Do you need automated and mass authentication of e-signatures?**

#### **Choose WebNotarius – API!**

The service allows for efficient integration of WebNotarius with an IT system used in your company. It provides full automation of the validation process of a very large number of signed e-documents.

## Do you need to verify documents containing sensitive data?

### Choose WebNotarius – Validation Gateway!

This service allows you to check confidential e-documents that do not leave your system. The validation gateway sends only the signature and abridged document, then you receive an e-signature validation.

.....

## How does it work?

1

You receive a signed  
e-document

2

You check its credibility

3

You receive a certificate  
of authenticity

.....

## What makes WebNotarius different?

- The only qualified validation service in Poland.
  - The first service on the European market.
  - Validates all e-signatures and e-seals from the EU.
  - Audited periodically by independent certified auditors.
  - Available in 3 integration models.
- .....

## Bet on quality.
